

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

A N  
ALPHABETICAL T A B L E  
FOR THE  
THIRD VOLUME  
OF THE  
PHILOSOPHICAL TRANSACTIONS  
In the Year 1668.

---

The 1 Figures relate to the *Number of Tracts*;  
The 2 to the *Page*.

---

**A**ches heal'd by the Fat of Birds call'd *Fegati* in *Jamaica*; and by the Fat of a Shel-fish, there call'd *Soldat*, n. 36. p. 706.

*Agriculture* improv'd by Hopp-Claver, &c. 37, 722, 725. Correct the Error, 70 loads for 70 *combes*.

*Air*, not by meer moisture, but by other mixtures, viz. of Salin steams of the Sea, dissolves Sa't, Sugar, Flesh; Sugar dissolves human bodies into Consumptions, 36, 69.

*Aloes*, and *Lignum Aloes* described: A soft white wood, yielding a milky and poisonous juyce, 43, 863.

*Anatomical* remarks upon a Leaden Bul'et voided by Urine, 40, 803. The use and description of the Lymphatick Vessels; the conduct of the ferment into the *Ductus Thoracicus*, to the Heart, &c. the moisture in the *Amnion* is not Urine, nor Sweat: Also the *Ductus Virginius* delivers it self into the *Du'denum*: the *Ductus Salivares* into the Cistern. V. De *Bills*,

40, 791. An account of the Origin and Effects of Transfusion in Veines; and other Anatomical Observations; De *Testibus in effigie*, by Dr. *Tim. Clark*, 35, 672. Transfusion of Blood viadicated from Calkunnies in *Paris*, 36, 710. The success of Injections into Veines at *Dantzick* in curing the Gout and Plica, 39, 766. An old deaf Dog in *Italy* reviv'd, and his hearing recover'd by Transfusion, &c. 42, 840. *Testis Examinatus*, Queries, and some Resolves, and References, 42, 843. Anatomical remarks on *Thom. Parre*, who dyed in the 153 year of his Age, &c. 44. See more in the Title of *Books*, De *Gracff*, &c.

*Answers* from *Jamaica* and other Islands thereabout, concerning the steames and colour of the Sea: Various Pens and Animals: How *Tobacco* grows in Nitrous places: Hurricanes: The effects of the change of Climate on humane Bodies: A probable way of preventing and curing sicknesses in Sea-Voyages to the *West-Indies*,

## An Alphabetical Table.

36, 699. And more, 37, 717. *Answers* Additional, referring to those of *Jamaica*, by an Eye-witness, 41, 824.

*Answers* from *Bermudas* concerning the Tydes there, Whales, Sperma-Ceti, strange Spiders-Webbs, rare Vegetables, Longevity of the Inhabitants; and of the Isle of New-Providence among the *Bahama's*, 40, 792.

*Answers* and Rarities from *Java-Major*, additional to Accounts, published in the Hist. of the R. Society, 43, 853.

*Answers* concerning Mendip-Mines, 38, 767.

*Answers* concerning Tydes from *Plimouth*, 33, 612. Dr. *Wallis's* applications of the Account of Tydes to his Hypothesis concerning Sea-refluxes, 34, 652. The Table of Tydes about *London* rectified, 34, 656. How Tides flow about *Bristol*, 41, 813. at *Bermudas*, 40, 793.

*Answers* Chymical and Mineral, &c. from *Mexico*, 41, 817.

*Antimony*, exten crude, fattens Horses, Swine; cures them of Diseases, 39, 774.

*Artificial Opals*, Amethysts, Saphirs. The old Art of incorporating Red-glass recovered. Of Diamond Looking-glasses in a Mill; and of making faire and hard Chrystals, 38, 743.

### B.

**A** *Beans*, præcipitating the Muddiness of water. See *Answers* from *Jamaica*, *supra*.

*Bloody Fluxes* stop'd by the blood of the Fish *Bedille*. See *supra* *Answers* from *Java-Major*. Blood transfus'd, see *sup* *Anatomy*.

### *Books.*

*Algebra*; an Introduction to it, translated out of High-Dutch into English by Mr. *Branker*, and much alter'd, and enlarged by D. I. P. with an account of other helps in that Art; abbreviated, 35, 688.

*Steph. De Angelis*, de Infinit. Spiralibus inversis, infinitisque Hyperbolis, aliisque Geometricis, 37, 738.

R. *Anderson's* Sere-metrical Propositions, variously apply'd, but particularly to Sailing, 35, 765.

Mr. *Boyle's* Continuation of New Experiments Physico-Mechanical touching the Spring and weight of the Air; and the Atmosphere of solid bodies, 42, 845.

*Ol. Forrichii* de Ortu & Progressu Chymix 39, 779.

*Tych Brahe* Historia Cœlestis Observationum vicennialium, 43, 858.

Joh. Dom. *Cassini* Ephemerides Medicorum Syderum, n. 44.

Ren. *Des Cartes* Epistol. pars 1. & 2. Lat. 40, 810.

The Bishop of *Chesters* Essay towards a Real Character and Philos. Language, 35, 690.

M. *De Cordemoy's* Natural Discourse of Speech in English, 37, 736.

Abrah. *Cowley's* 6 libri Plantarum Poema, Latine, 36, 716.

M. *Evelyn's* Translation of the Idea of the Perfection of Painting, 39, 784.

*Florentin* Experiments, 33, 640.

Regn. de *Graef* de Virorum Organis Generationi inservientibus, 38, 750.

Idem de *Graef* de nonnullis circa partes Genitales Inventis novis, 34, 663.

M. *Glinvils* Progress and Advancement of Knowledge since *Aristotle*, 36, 717.

*Grabe* *Elaphographia*, 39, 885.

Jac. *Gregorius*, de Vera Circuli & Hyperbolæ Quadratura, &c. 33, 640.

Idem Geometriæ pars Universalis, quantitatum Curvarum Transmutationi & Mensuræ inserviens, 35, 685.

*Hevelii* Cometographia, 40, 805.

Joh. *Hornii* Observ. circa partes Genitales in utroque sexu Prodromus, 34, 663.

Stanislai de *Lubcienierz* Theatrum Cometizum, 35, 692.

Marc. *Malpighii* de Viscerum Structura, n. 44.

*Mayow* de Respiratione & Rachitide, 41, 833.

*Mercatoris* Logarithmotechnia, and Dr. *Wallis's* his Judgement on it, and Mr. *Mercator's* Explication on his said Book, 35, 153.

A Discourse of *Physick* and *Pharmacy*, the Interest of Patients, and the Frauds of Apothecaries, Empiricks and Mountebanks, 41, 826.

Mich.

## An Alphabetical Table.

Mich. Ang. *Ricci* Exercitatio Geometrica, 37, 717.

*Salvove* de la Venerie Royale, 37, 740.

Franc. de la Boe *Sylvii* Praxis Medicæ Idea Nova, 40, 811.

*Symfons* Hydologia Chymica: His Anatomy of the Waters of Scarborough, Malton, *Knarethorpe*; his Vindication of Chymical Medicines: Improvement of Experimental Philosophy: The Principles of all Concretes: His Ternary of Medicines: The Origin of Hot Springs, and all other living Springs, 42, 850.

And, *Tacquet's* Opera Mathematica; with reflexions and further Instructions, 43, 869.

Joh. Georg. *Trumphii* Scrutinium Vitrioli, 40, 810.

N. B. That, besides the Extracts of these 32 Book, here are added (especially in Mathematics) fit Cautions and Advices of other further supplements.

*Brain*. Its Exterior part Glanulous, 44. see *Malpighi* supra.

A *Burning-glass* extraordinary made at Milan. 40, 795.

### C.

*Cabbage-Trees* in the Caribbe-Islands of 300 foot in height; the wood never rots, and when dried as hard as Iron. See Answers from Jamaica, 36, 704.

*Calenure* at Sea described, and the Cure, 36, 708.

*Calmes* frequent near the Gulf of Mexico, 36, 707.

*Caymans*, or Jamaica *Crocodils* and *Alligators* have small Eggs like *Turky's*, but unspotted, 36, 703. the Stone in their Stomack is little regarded there, 36, 703.

*Chymical*, Medical and Anatomical Observations of special remark. from the Consul Behm of Danzig, 34, 650.

*Chocolata* commended, 37, 721.

*Civet-Cats* live well and yield the more Civet, if you give them Drink once a month. They pile much, as Rabbits do, 36, 704.

*Climats*: the effects of their change near the Tropicks: and Medical application directed, 36, 708.

*Clouds* and Mists, how they gather and imbodey in Jamaica, 37, 718.

*Colick* and Morbifick effervescency's examined, 34, 651.

*Colick* bilious, what Clysters good or bad for it, 37, 720.

A *Comet* appearing in Italy and Portugal March 1658. n. 25. p. 683.

*Cochineel*, what it is, and whence, with considerations for like Advancements in Colors, &c. 40, 796.

### D.

*Deafness*, somewhat lessen'd, though strangely, by Noise, 35, 665. helped in a Dog by *Transfusion*. See *Anatomy*.

*Divers*, by custome continue long under Water, to draw up Anchors, Guns, &c. 41, 863.

*Drink*, not necessary for all Animals. Cowes and Bulls live without Drink, their Bladders being dried up, 36, 704.

### E.

*Earth's* motion oppos'd by Ricciolus, whose pretended great argument is animadverted upon by *Steph. Angeli*, with Mr. Gregory's Illustrations, 36, 693.

*Eye-sight*, how to be help'd in Man or Beast, by Artificial Instruments, and better than by Spectacles, 37, 727. & 39, 765. & 40, 802.

### G.

*Gout*, the Causes, best helps, and hope of Cure, 34, 650. Magnet. *Transplantations* ineffectual *ibid*.

*Hart*; the medical uses of all its parts, 39, 885.

*Head-ach*, eased by applying the Leaves of Palma Christi in Jamaica, 36, 705.

*Heart*: of its Polypus, &c. 44. See *Malpighi* in the Title of *Books*.

*Hurricanes* described; seldom in Jamaica, 36, 706.

*Husbandry* improv'd by the incredible growth of Hop-clover, call'd also Non-fuch, 37, 725.

### I.

*Introduction* and Preface to the *Tracts* for the year 1668. n. 33.

*Inquiries* & Directions for the Carib-Islands 33, 634. *Inquiries* concerning the growth of Vegetables, the motion and Qualities of their Juices for medicines, for Colors, &c. 40.

## An Alphabetical Table.

797. with *Inquiries*, and particulars, and further promises to Ever-greens and Kitchen-gardens, *ibid.*

### K.

**K**idneys, a concrete of small glandul, &c. n. 44. See Malpighi in the *Title of Books*.

### L.

**L**audanum Simplex of M<sup>r</sup>. Le Fevre prefer'd upon Experience before some other kinds, 37, 719.

*Light*, or *Shining Flies* in Jamaica, which can contract or expand their light, as they flye, 36, 706.

*Lice*, where and how bred most, 37, 72.

*Lice*, call'd *Chego's*, of a very malignant nature in Barbado's, 36, 705.

*Liver*, is a conglomerate Giandul, against D. Wharton: its office and use, &c. n. 44.

*Long Life*, constant health to the Natives, sweet Air in Bermudas, and some partes of Virginia near Florida, 40, 794.

### M.

**M**athematicals. The Squaring of the Hyperbola by an infinite Series of Rational numbers, by the Lord Viscount Brouncker, 34, 645. Mr. Gregory's Defence of his Circuli & Hyperbolæ Quadratura, in reference to M<sup>r</sup>. Hugenius, 37, 732. A reply of the same to M<sup>r</sup>. Hugenius his Answer, n. 44. Du Laurens his Specimina Mathematica animadverted on by Dr. Wallis, 34, 654. & 38, 744. & 39, 775. & 41, 825.

*Motion*. A Summary Account of the General Laws of it, by Dr. Wallis and Dr. Wren, 43, 854, 87.

*Motion of the Earth*. See Earth's motion.

*The Magnetical Variation*, taken near Bristol, June 13 1666, not 1668; Correct the Printers Erratum. n. 37. p. 746.

*Magnetic Variations* predicted for many yeares following, as at London, from an Hypothesis yet concealed, 40, 789.

*Manchineel Tree* in Jamaica, a Malignant Wood, but of an excellent Graine,

used by the Spaniards for Bed-heads, by the English for Floors, 36, 706.

*Mariners*, How they make a Boat to ride at Anchor in the Main-Sea, described, 36, 707.

*Medical Directions* for Sea-Voyages, 36, 708, & 37, 719. See Answers from Jamaica.

*Mineral and Chymical Observations* from Spain and Mexico, 41, 87.

### N.

**N**ut in Jamaica, which purgeth some, faileth to purge others; the Dose uncertain, 37, 719.

*Nutmeg*, call'd Thieving, one alone put into a whole Room-ful of Nutmegs, corrupts them all, 43, 853.

### O.

**O**cular Aydes for a decay'd sight, when all Spectacles faile, 37, 727. See *Eye-sight*.

*Optical Improvements*; by Mr. Smethwicke, in a Figure not-Spherical, 33, 631. *Glasses*, how turned at Paris by a Turn-lath, 40, 795. A way to turn convex Spherical Glasses on a Plain, represented here in Cuts, 42, 837. A *Microscope* of a new fashion, taking in large Objects, and discovering more minute Bodies, than formerly discover'd, 42, 842.

An *Optical Contrivance* for strange visions, or Apparitions, 38, 741.

The *Optick Nerve* and Vision by a New Experiment, examin'd, 35, 668.

*Osteo-colla*, 39, 771.

*Oyle of Palma-Christi* in Jamaica, plentifull, sweet, delicate, and transparent, but ineffectual in Clysters: It might be a Staple-Commodity, 36, 705.

An *Oyle* very fragrant, drawn out of the Barke of the Tree *Lawing*. See Answers from Java-Major, 43, 865.

### P.

**P**almetto highly extoll'd, a livelihood in Bermudas, 40, 795.

*Poison-weed* in Bermudas dangerously poisonous to some, not so to others, 40, 794.

*Poisonous Juyce* to Man, Hogs, and Powltry in the Manioc or Cassavi; but if rectified,

## An Alphabetical Table.

rosted, it only causeth Torsions in the Belly, 36, 705.

### R.

**R**ain in Jamaica without previous alteration in the Air, nor leaving moisture in the Air afterwards, 36, 705.

*Respiration.* See *Mayow* in the Title of *Books*.

*Rickets.* See *Mayow* in *Books*.

### S.

**S**alts lixiviate, of Wormwood, &c. not apt to be consum'd, or to contract moisture in the Barbadoes, or Jamaica, but on the Seas they do, 36, 699.

*Salt-Peter-ground* yields flashing Tobacco, and Potato's ripe two Months sooner, but that Tobacco and Potatoes rot speedily, 36, 74.

*Seas*, their differing colours, 36, 700.

*Serpents*, having in head on each end of the Body. See *Answers* from *Jawa-Majors*, 43, 63.

*Sharke* and *Tiberon* all one; differs from the Minati or Sea-Cow: the Manari-stone is properly no stone, but a white Brain-like matter dried, 36, 703.

*Soape-trees* in Jamaica; the Berries large, as a Musket-bullet, without any proportion of Salt lixiviate, Sulphur or Oyle, wash better than any Castile-Soape, but soon rots the Linnen, 36, 705.

*Sperma-Ceti*, what, and whence taken, 40, 793.

*Spiders Webs* of great strength in Bermudas, 40, 795.

*Spleen*, is acquitted of acid Melancholy and Sanguification. The properties of it, and Dr. Highmores judgement of it considered, 34, 651. Is Glandular, according to Malpighi; its office and use, n. 44.

*Starre*; a New one, as is guessed by Cassini, seen in *March* 1668. n. 35, 683.

*Sugar*, how it inclines to Consumptions, 36, 699.

*Symphathetical-Powder*; of what Vitriol and how best prepar'd, and the effects of it. See in *Books* *Triumphii* *Scrutin*. Vitrioli.

*Swallows* depart out of Jamaica in Winter-month, as hot-as-tis; and Teal

and Wild-Duck come thither then, 36, 704.

### T.

**F**or *Tanners*, 3 Trees in Jamaica, the Mangrove, Olive, and another nameless, yield Bark, which Tans better (and in 6 weeks) than any in England, 36, 705.

*Teeth*, some Whales have none, some have, 40, 793.

*Tides*, See *Answers* concerning Tydes.

*Tiles* in Bermudas excellent, made of the leaves of Palmetto, 8 or 10 foot long, 40, 795.

*Tiberorum lapis*, see *Sharke*. The Tiberon hath a vast strength, yet hath no bone in his back, onely in his head are bones; his Jawes are Gristles; his Ribs make walking-staves. This, and the Dolphin, and the Spanish-Macarel swim faster than any Ship saileth, 36, 704.

*Tortoises* swim, or floate a fl ep at Jamaica, yet have no swim, as Dr. *Stubs* remembreth, 37, 719.

### V.

**V**egatables for Juices, Tappings, Growth, Colors, Medicines, Ever-greens, Kitchen-gardens. See *Inquiries* and *Directions* *supra*, 40, 796, &c. And some answers, 43, 853. Continuation upon the same subject, 41, 877. *Stone-plantes* growing on Rocks in Jamaica, and curiously adorn'd, 36, 700. *Osseo-colla* growing soft and like a Plant underground in the Sand, and the top, like a flower, visible. See the History thereof 39, 771. *Gramen Ischemon*, or Dactyloides, or Sanguinella; and *Gramen Aquaticum* cum longissima pannicula, &c. 39, 773. A *Vegetable-seed* common in the Fields of Denmark, which having been once heated red-hot, and then taken out, and put in a cool place, remains hot and burning for 50 houres together, 39, 783. The *Cinnamon-tree*-Roots yield an Oyle resembling Camphire, 43, 863.

*Vitriol*, how extract'd out of Vitriolate Earth; the choice, medical Vertues, and history. See *Triumphii* in *Books*, 40, 810.

## An Alphabetical Table.

*Vomitings* in hot Climates and hot Seasons much prefer'd before Clysters and Purges, 36, 709.

### W.

**W**ater percolates from the Seas through the Sands, to rise and fall with the tides, wherever they dig at the point of Jamaica; yet no steames arise there by heates, 36, 701.

*Weavits* breeding in meal, currans, raisins, &c. how to be destroy'd in Jamaica, 36, 701.

*Whales* of strange kinds about Bermudas described, 40, 703.

*Winter*, see *Swallows*, supra.

*Wood*, a Bastard-Cedar in Jamaica, seeming close-grain'd, but penetrated by Brandy and Wine, 36, 705. Many sorts of Wood there, besides Acayou, which breed no Wormes. A white wood there,

which in Ships breeds no Wormes, 36, 705.

A Wood stinking like human Excrement: See *Answers* from Java-major, 43, 863.

*Wood-Lice* in Jamaica, which eat Books, the Paper, Print, and Covers, and some sorts of Wood, not all sorts, 36, 706.

---

## ERRATA.

**N**umb. 43. p. 876. line 48. dele all this, p. 865. l. 24. r. mPC; p. 866. l. 3. dele, *sinistrorsum*; and read it, as 'tis in the Text: but p. 865. l. 28. r. *reapse*, p. 870. l. 21. r. *Præcelsion*, p. 855. l. 10. r. *Elder*, not *Alder*, twice. p. 857 l. 25. r. plac'd in it and.
